

**A selection of medications commonly needed by MAMA Project medical brigades. It is recommended to print these and compile a notebook for each practitioner to use as reference while seeing patients. Feel free to add other sheets as needed.**

**MSF has published excellent summaries of oral, injectable, and topical, antiseptic and disinfectant product, as well as infusion fluids, and vaccines, immunoglobulins and antisera. The lists are from the WHO Essential Drugs and are updated regularly, including warning on products that are no longer recommended.**

## **Essential drugs**

**Practical guide intended for physicians, pharmacists, nurses and medical auxiliaries**
