

South Sudan needs our help!

As many as 2.2 million people are fleeing war and conflict in the area of Sudan & South Sudan. Many have settled in camps for refugees & IDPs (Internally Displaced People). They have found safety, but now face problems with little to no food, no clean water, no shelter, and no medical aid. This is where MAMA Project and our supporters can help.

Of the 2.2 million people, it's estimated that 85% are women and children, and 65% of those are under the age of 18. With our continuing

support, we will be able to provide clean drinking water by installing new wells or fixing broken ones, supply farmers in the camps with seeds and tools to start cultivating crops, and provide tarps & mosquito nets for shelter against the weather & disease carrying insects, just to name a few. We're also seeking funding to purchase all-terrain tricycle ambulances for the camps to take those in dire need of medical attention to the hospital.

Here's where you can help!

We currently have a [GoFundMe](#) campaign for emergency food relief.

We also have a [popcorn/snacks](#) fundraiser that ends July 30th. Half of your purchase comes straight to MAMA Project. These are great options for summer parties, back to school snacks, or that 2pm pick-me-up. Your purchase ships to your home so there is no worry about pick up arrangements, allowing people all over to participate.

We have an ongoing fundraiser through the RaiseRight app. After learning of a woman who was having pregnancy complications, died on the way to the hospital because the ambulance did not have enough funding to have a full fuel tank, we decided any funds raised through purchasing eGift Cards will go straight to maintaining emergency transportation from the camps to the

A mother grieves for her child that died after a 4 day walk with no food or water, seeking the safety of the refugee/IDP camp.

hospital. Many retailers participate. It's simple - purchase an eGift card through the app and the brand donates a certain percentage to MAMA Project. An eGift card is placed in your "wallet" in the app within seconds of purchase, which allows consumers to buy the eGift cards as they're walking into the store. You spend the same amount of money, why not do it through the app to help MAMA Project. If you're interested, please email info@mamaproject.org and request our unique code.

There are other fundraising and donation opportunities on our [website](#).
